

EMER JOSEPH U. TARLENGCO

Quezon City | +63 9395664092| emer.tarlengco@gmail.com
Portfolio: https://github.com/JosephEmer05/Tarlengco_Portfolio.git

Detail-oriented BSEMC Student with a solid foundation in entertainment computing and a strong analytical mindset for game design, level layout, and interactive mechanics. Combines creative presentation skills developed through theater performance with practical, hands-on experience programming and designing academic game prototypes in Unity. Proactive team collaborator eager to leverage an acute eye for finding glitches and analyzing system.

CORE SKILLS & COMPETENCIES

Technical Skills

- **Programming Languages:** C++, C#, HTML, JavaScript, Python
- **Developer Tools & Version Control:** GitHub, MS Visual Studio, Visual Studio Code
- **Game Engines:** Unity, Unreal Engine, Godot
- **2D & 3D Design Software:** Adobe Photoshop, Aseprite, Canva, Blender
- **Office Document & Collaboration Tools:** MS Office, Google Workspace, Discord, Miro

Soft Skills

- Excellent written and verbal communication skills in English and Filipino
- Interpersonal skills with a people-first approach while achieving objectives
- Adaptable team player experienced in bridging communication between art and programming tasks
- Strong organizational, time management, and multitasking skills
- Adaptability to diverse workflows, processes, and client requirements
- Open-minded perspective on game design and player preferences
- Analytical problem-solving and critical-thinking abilities when evaluating game loops
- High attention to detail during game testing, balancing, and mechanical optimization

KEY ACHIEVEMENTS

- Frequent Dean's List student (Current GPA: 3.47)
- PGDX 2025 game showcase participant for Deep Space Tavern

GAME PRODUCTION PROJECTS

Factory Frontline | 2.5D Strategy Tower Defense Game

- **Role:** Main Game Designer, Level Designer, Programmer
- Formulated the core game loop, balancing the attribute of unique towers against the waves of enemies
- Designed and blueprinted the structural level layout to ensure strategic depth and smooth enemy pacing
- Collaborated on code implementation debugged mechanical loops within the game to secure a stable build

Deep Space Tavern | 3D Restaurant Management Game

- **Role:** Game Designer, Asset Integration, UI Designer, Animator
- Collaborated in Ideation of game design and mechanics
- Mapped out 3D level environment and asset creation and integration
- Managed basic animation and ui animation

Heat Temple | 2D Vertical Arcade Platformer Game

- **Role:** Main Game Programmer, Level Designer, Asset Integration
- Programmed the primary movement and hazard mechanics
- Designed level pacing inspired by other vertical arcade runner to challenge player reflex and progression

EDUCATION

- BS in Entertainment and Multimedia Computing – CIIT College of Innovation and Integrated Technology, Quezon City (August 2023 – Expected date of graduation July 2027)
 - Relevant Course Work: Game Design and Production Process, Scriptwriting and Storyboard Design, Artificial Intelligence for Game Dev, Web Programming, Software Quality Engineering, Free Hand and Digital Drawing, Computer Graphics Programming, Usability, HCI, UI Design, Audio Design and Sound Engineering, Applied Mathematics and Physics for Games, Game Programming, Game Networking, 2D Animation, 3D Animation

CERTIFICATIONS & TRAININGS

- Crafting of a Compelling Story: Techniques for Animation and Film – CIIT (November 7, 2024)
- Make Games Faster: The AI Multiplier Effect – CIIT (November 18, 2025)
